EUROPEAN FEDERATION OF RADIO OPERATED MODEL AUTOMOBILES

Sander de Graaf, Beekmansbos 53, 1971 BX IJmuiden, Netherlands

IJmuiden, Dec. 21st 2008.

Dear Sportfriend,

With reference to the decision made at the AGM, you will find here the preliminary list with mufflers for 2009. Homologation for new mufflers is still possible in the first weeks of 2009, so this list will be updated at the end of february.

IFMAR will also be notified of the new list, so their list will not be very different from the EFRA list (only FEMCA and ROAR mufflers will be added).

EFRA3007	NovaRossi	

Although with the decision at the AGM the call for less noise has been suspended, I hope that all the muffler manufacturers will not stop investing in a new and proper design that will bring the noise down and has no effect on the motor temperature. It is absolutely neccessary that we get some new prototypes in during the early 2009 season, so that we can test those pipes good. This means mufflers for both 1/8th and 1/10th scale. For any muffler that you want to conclude in the 2009 list make sure you send me first a drawing and after approval of the drawing 2 samples. These samples must be in my position before 10th of February.

If a lot of manufacturers will send in new samples that comply with the new rules (82 dB's), we can try to arrange a test session at a track in Italy somewhere halfway the 2009 season to test all those mufflers in 1 weekend. With some help of fast factory drivers and fast engines this probably will benefit a lot and gives EFRA an idea how far we are. This is valid for both 1/8th and 1/10th mufflers

Regards,

Sander de Graaf

EFRA 1:8 Track Section Chairman and homologation officer.
